Build a Paper Helicopter

Create this helicopter that spins when you throw it.

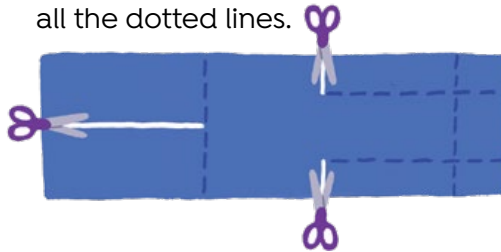

You Need

- Construction paper
- Ruler
- Scissors
- Pencil or pen
- Paper clip

1. Cut out this two-by-eight-inch rectangle from the paper and follow the instructions below.

2. Cut along the solid lines. (There should be three cuts.) Fold, crease, and unfold along all the dotted lines.

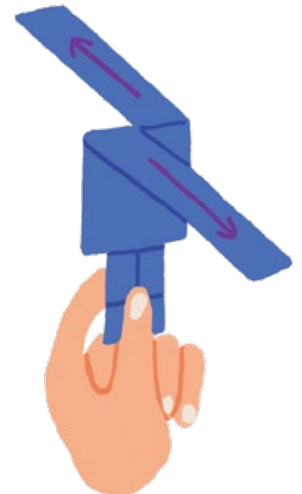

3. Fold the top and bottom sections along the dotted lines, as shown, toward each other.

4. Fold the end inward and secure with a paper clip.

5. Fold the propeller sections down in opposite directions.

6. Throw the helicopter as you would a paper airplane. Watch it spin as it falls!
