

A JOLLY SANTA

THIS JOLLY SANTA can jump and dance. He would be a very nice gift.

Materials needed: cardboard, scissors, string, cotton, a pencil, and red and black paint.

Ten sections of his body are shown above.

Draw these sections on cardboard, cut them out from the cardboard, and punch holes at the points indicated.

Draw a knotted string through the punched hole of the lower leg until the knot is tight against the cardboard. Then pull the same string through the lower

hole of the upper leg. Tie a knot in the string so that it also rests against the cardboard. Clip the string. Now you have joined two parts making one leg. Follow the same plan in making the other leg and the arms. Then connect the arms, legs, and head to the body in similar manner.

Draw a face and hat on your Santa. Then color the hat, arms, body, and upper legs red. The lower legs will be black, suggesting boots.

Use bits of cotton for boot-tops, wrists, buttons on his jacket, whiskers, mustache, hair, and cap tassel.
